

Part Number: **BD-NEH1116HN**

### *Aver BD-NEH1116HN H.264 - 8ch hybrid DVR w/ GUI & local display*

#### **EH1116H**

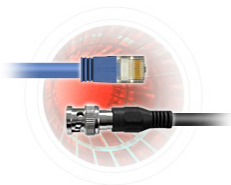

**Ultra-reliable 16-CH hybrid performance coupled with everything you need for local and mobile video security management**

- Embedded Linux
- Award-Winning GUI
- Hardware H.264 Compression
- Remote Video Monitoring via IE, iPhone, iPad, Android and Blackberry Devices
- 2 Year Warranty

#### **Ease-of-use Matters**

The EH1116H has an embedded Linux base but behaves more like a PC-based DVR. Why? Because you still get AVer's award winning Graphical User Interface to manage it as opposed to a laborious menu driven structure. You get the ease of use along with the Linux "install it and forget about it" reliability.

Part Number: **BD-NEH1116HN**

### Hybrid Integration Matters

If you already have analog cameras and want to add on a few IP cameras (up to 4), that the EH1116H is definitely your DVR. License-free IP channels, support for 50+ IP camera brands and ONVIF Compliancy, this is a hybrid solution you really can work with. Check out our IP Camera Support list for a complete list of supported cameras.

### Budget Matters

When you are installing in gas stations, convenience stores and small businesses, we know every penny counts. The EH1116H not only delivers a great price, but comes with better-than-standard features **including full hybrid functionality, a robust Graphic User Interface and expanded remote management capabilities**. User-friendly operation, low maintenance, essential surveillance functions and great value makes the EH1116H perfect for deployments in smaller facilities.

**All AVer solutions are bundled with our award-winning software that ensures that from monitoring, searching, retrieving to exporting, your video surveillance is as effortless as possible.**

### Video Management Software

***Manage, monitor, search, and export your DVR video data easily and effortlessly***

# AVer™

Part Number: **BD-NEH116HN**

From the intuitive icons, thoughtfully arranged navigation tools to proactive event alarms and notifications, AVer solutions really are operator friendly. And that takes the complexity out of video management.

### Alarms and Notifications

With the built-in event alarms, it is easy to isolate, prioritize and manage unfolding situations. In **fact real-time notifications are not only pushed locally to the monitored DVR, but also remotely to mobile devices.** From relay protocols (locking gates, etc.), phone calls, emails, warning sounds and more, the system stays vigilant so you don't have to.

### Consistent interface

**The same Graphical User Interface is used across all our DVRs and NVRs.** So when you learn to navigate one AVer system, you learn to navigate all of them.

### Dual Monitor Support

Our Windows based system support dual-monitors, Allowing you to **allocate the second monitor for E-maps, playback and more.**

**AVer**™

Part Number: **BD-NEH1116HN**

**An astonishingly wide variety of recording and search features are available with AVerMedia DVRs. So when life does happen, you are guaranteed that it was seen and recorded. Even more AVerMedia's forensic tools allow operators to quickly and efficiently retrieve, analyze, bookmark and export video**

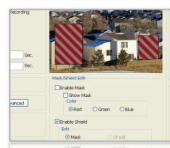

### **Visual Search**

Drill down video image thumbnails from days, hours, minutes and seconds to quickly pin point important activity in seconds

### **Intelligent Search**

Define areas in recorded footage with missing objects and the software will automatically retrieve video from the last motion sensed in that region

### **Video Mask and Shield**

Manipulate recording preferences by either adding a privacy Shield or partition off areas from triggering motion based recording with a Mask
